Investment strategy

A global selection of companies supporting the environmental transition

Sycamore Global Eco Solutions invests in international listed companies across the entire market capitalization spectrum. The fund focuses on companies with business models that contribute to the environmental transition according to the Net Environmental Contribution (NEC) metric, covering a wide range of areas: renewable energy, energy efficiency and electrification, mobility, natural resources, renovation and construction, circular economy, food, and ecosystem services. The fund excludes businesses that destroy biodiversity, contribute towards global warming, or display poor Environmental, Societal and Governance ratings.

Performance as of 29.11.2024

Fund commentary

Equity markets delivered positive returns in Europe, supported by post-election optimism in the US and robust macroeconomic indicators. However, the Republican victory introduced some uncertainty over the future of the Inflation Reduction Act and the evolution of interest rates. This environment weighed on the performance of renewable energy players. Our decision to reduce the fund's exposure to pre-election risks through targeted thematic diversification (data centre energy efficiency, smart grids, sustainable construction) maintained the fund's performance in line with the MSCI ACWI index. While we wait for visibility to improve in 2025, we continued to restrict our exposure to US renewable energy stocks to local producers (First Solar) and the soundest players (EDPR, Nextera Energy). Meanwhile, we also strengthened US companies with a strong domestic profile, notably within the waste industry (Waste Connection, Clean Harbors), the insulation (Carlisle) and equipment rental service sectors (United Rentals).

SPICE, for Society & Suppliers, People, Investors, Clients, Environment is our tool for assessing a company's performance on sustainability criteria. This tool incorporates the analysis of economic, governance, environmental, social, and societal risks and opportunities covering both the company's daily operations and its product and service offer.

The analysis process covers 90 criteria and leads to a rating per letter. These 5 ratings are weighted based on the company's most material impacts*.

	Fund	Index
SPICE	3.7/5	3.3/5
S score	3.5/5	2.8/5
P score	3.6/5	3.1/5
I score	3.7/5	3.6/5

Environmental analysis

Net Environmental Contribution (NEC)**

Degree of alignment of economic activities with the ecological transition, integrating biodiversity, climate and resources, on a standard scale from -100% for total misalignment to +100% for complete alignment, where 0% corresponds to the world economy average. The results are calculated by Sycomore AM or by the nec-initiative.org based on data for the years 2022 to 2024 according to NEC 1.0 or 1.1.

Greenfin Breakdown**

Companies breakdown according to their green revenues' content and to excluded activities as defined by the Greenfin certification and as estimated by Sycomore AM or audited by Novethic [label Greenfin](https://label.greenfin.com), estimated by Sycomore AM or audited by Novethic.

Incuted temperature rise

In °C by 2100 compared to the pre-industrial era according to the Science-Based 2°C Alignment, SB2A methodology (source Iceberg Data Lab).

Coverage rate : fund 74%

*IPCC Sixth Assessment Report «Climate Change 2022: Mitigation of Climate Change». <https://www.ipcc.ch/assessment-report/ar6/>

Climate alignment - SBTi

Share of companies that have validated their greenhouse gas reduction targets with the Science-Based Targets initiative.

Carbon footprint

Annual greenhouse gas emissions (GHG Protocol) from upstream scopes 1, 2 and 3 per thousand euros invested, as modelled by MSCI.***

Coverage rate : fund 98% / index 98%

	Fund	Index
kg. eq. CO ₂ /year/k€	3394	344

European taxonomy

Share of EU taxonomy-eligible company revenues provided by MSCI.

Coverage rate : fund 97% / index 99%

	Fund	Index
Eligible share	69%	36%

Fossil fuel exposure

Share of revenues from activities linked to fossil fuels from upstream to energy production, supplied by S&P Global.

Biodiversity footprint

Surface maintained artificially in m².MSA per k€ invested***, modeled by the CBF on scopes 1, 2, 3 upstream + downstream (IDL source) and expressed as normalized surface according to the average abundance of species.

Coverage rate : fund 72% / index 40%

	Fund	Index
m ² .MSA/k€	-43	-22

Societal and social analysis

Societal contribution

Contribution of the economic activity of companies to the resolution of major societal issues, on a scale from -100% to +100%.

Coverage rate : fund 100% / index 66%

Staff growth

Cumulated growth in company headcounts over the past three financial years (data unadjusted in the event of acquisitions, excluding transformational deals).

Coverage rate : fund 96% / index 79%

Sources: portfolio companies, Sycomore AM, Bloomberg, Science Based Targets, Iceberg Data Lab, MSCI, Moody's, MSCI and S&P Global. Methodologies differ between issuers and between extra-financial data providers.*ESG-SPICE correspondence: E=E, S=(P+S+C)/3, G is a sub-part of I, which represents 40%.**The fund has committed to outperforming the benchmark on these two indicators. The other indicators are shown for illustrative purposes.***Footprint allocated prorata to enterprise value, cash included (MSA= Mean Species Abundance / CBF = Carbon Biodiversity Footprint / IDL = Iceberg Data Lab).

Sustainable development goals exposure

This chart represents the main exposures to the United Nations Sustainable Development Goals and their 169 targets. Exposure is defined as the opportunity, for each company, to contribute positively to reaching SDGs, providing their products and services. This exercise doesn't aim to measure the companies effective contribution to SDGs, which is computed through our societal contribution (CS) and net environmental contribution (NEC) metrics. For each invested company, activities are analysed in order to identify those which are exposed to SDGs. For a same activity, its number of targets can vary between 0 and 2. The company target exposure to one of its activities is weighted by the revenue share gained from this activity. For more details, our annual SRI report is available in our ESG documentation.

No significant exposure : 11%

Note: while SDG # 13 does not feature explicitly in this classification, this SDG remains one of the key objectives of our investment strategy and a factor that is systematically integrated and assessed, both at stock picking level and in our measurement of impacts. Nevertheless, based on the wording chosen by the UN, SDG # 13 cannot apply to a corporate company.

ESG follow-up, news and dialogue

Dialogue and engagement

SIG

We discussed the potential of SIG's aluminium-free solutions with management. These solutions can lower the carbon footprint by 30% compared to standard solutions.

ESG controversies

Schneider Electric

One of the group's developer platforms was breached by a gang of hackers called Hellcat. Schneider was affected by a ransomware incident.

West Fraser

We asked the management to provide a percentage of wood from certified forest at company level and to formulate a goal to increase certification overtime. The company was willing to work towards this goal.

Vestas

A man died after being crushed beneath a wind turbine blade when working on a wind farm in Australia. One of the unions stated that safety concerns had been raised in a meeting two weeks ago. Responsible for the construction works, Vestas confirmed that a sub-contractor had died after preparing a turbine blade that was on the ground prior to installation. The site has been closed to allow for formal investigations.

Votes

1/1 voted general assembly over the month.

Details on our votes are available here the day following the company's AGM [Here](#).
