Investment strategy

A responsible selection of that address today's social challenges.global companies

Sycomore Global Social Impact invests in companies that have a positive impact with regard to social issues, such as those highlighted by the United Nations' Sustainable Development Goals. We are convinced that companies that meet current social challenges are the most likely to generate sustainable operational and financial performance. Stock selection is based on a rigorous fundamental analysis that integrates sustainable development issues with a strong social dimension. This analysis is based on our SPICE model and our proprietary metrics associated with the different stakeholders that make up society (Consumers, Employees and Communities): the Social Contribution, the Happy@Work rating and the Good Jobs Rating. The investment universe is global, with no restrictions on capitalisation size.

Fund commentary

During January, the fund posted a positive performance and outperformed the relevant index. This was driven by strong contributions from the consumer discretionary, healthcare, and financial sectors. In the consumer discretionary sector, the luxury segment rallied significantly following Richemont's results. In healthcare, the positive trend from the end of 2024 continued, with Intuitive Surgical's positive pre-announcement. In the financial sector, the recent addition of JP Morgan proved beneficial. AI-related stocks started the year strongly following the pre-release of O3, a new product from OpenAI. However, this momentum was halted by the launch of Deepseek, a more cost-effective AI solution, causing investors to reassess their infrastructure investments. While we remain optimistic about the AI trade, we acknowledge that volatility will remain high.
